

CURTAIN TRACK & SYSTEMS (ALT-642)

Our typical hardware configurations include the curtain track, carriers (glides) to move back and forth within the track and end stops. In addition to window curtain hardware, we also provide high quality, commercial grade curtains. These curtain tracks are designed for ceiling as well as wall mount and include rigid metal tracks as well as curved and flexible curtain tracks.

Applications :

- Home
- Hotels
- Hospitals
- Bathrooms
- RV's (Recreation Vehicles)
- Bunk beds
- Cubicles

NURSE CALL SYSTEM (ALT-643)

The nurse call system is installed in a nursing unit. The system easily allows for the addition, removal or re-routing of services creating a dynamic, future-proof hospital infrastructure that can change and adapt in line with the needs of patients, practitioners and managers.

Features :

- Designed with static windows
- One can insert a bromide film (or something similar) with the required letters to identify the room
- Voice module with standard voice attention and patient calling instead of buzzer makes it distinguished
- Very low working voltage to ensure patient's safety
- Door indicator helps the nurses to locate the calling patient easily
- Call from a patient remains registered till the nurse attends the patient and clears the call from his room
